## TECHNICAL SKILLS

**Languages:** HTML/CSS, JavaScript, Python

**Frameworks/Libraries:** React, Bootstrap, Flask, Jinja2, Express.js

**Databases:** mySQL, MongoDB, Mongoose

**Tools:** Vite, Create React App, MySQL Workbench, Postman, Git, Github, VS Code, Node.js

## TECHNICAL EXPERIENCE

**Wishfor** : Application enabling users to build wish lists. Built using Node.js, MongoDB, Express.js, React.js and Postman

- Developed a sleek single-page app using Bootstrap for elegant page layouts.
- Created a robust back-end with Express and MongoDB, facilitating dynamic one-to-many relationships.
- Established secure user experiences with validated login/registration, cookies, and JSON web tokens.
- Designed UI components through Balsamiq wireframing for a polished user interface.
- Utilized Postman for API testing to validate functionality of requests

**RBG (Reviews By Gamers)** : Application for users to share video game reviews. Built using Vite, Node.js, MongoDB, Express.js, React.js and Postman

- Leveraged Vite to optimize build times, effectively accelerating the development lifecycle.
- Enacted a unified design strategy by seamlessly integrating CSS and Bootstrap throughout the application, culminating in a streamlined and efficient customization process.
- Capitalized on Vite's efficiency in reducing build times, thus enhancing overall development speed.
- Ensured a consistent and efficient customization process by incorporating CSS and Bootstrap cohesively across the application.

## PROFESSIONAL EXPERIENCE

### Kaiser Permanente
